# TURNED THE TIDE

Verse 1:
```
          B                                              G#m                      E      B
When my heart was hanging by a thread, and the dreams I'd dreamt were left for dead
          B                                       G#m                  E      B
Oh My soul was blind and I couldn't see, but You raised my head and You lifted me
      G#m                      E      B
God You raised my head and You lifted me
```

Chorus:
```
      E        G#m    B              F#
When the world gives way, I'm trusting in Your name
    E      G#m                F#
You alone, carry me through it all
        E        G#m    B              F#
Through the fire or flame, I'm trusting in Your name
      E      G#m              F#
You alone, carry me through it all
```

Verse 2:
```
      B                                    G#m                  E      B
When fear came knocking at my door and hope was scattered on the floor
    B                                         G#m                E      B
A battle raged from the war inside, but the peace You promised turned the tide
      G#m                      E        B
Oh the peace You promised turned the tide
```

Bridge:
```
      F#                  G#m                  E
Every star, every sky, every creature and every life
      F#                  G#m              E
Every home, every heart You carry
      F#                  G#m                  E
Every tear, every scar, every fear and all that we are
      F#                  G#m              E
Every hope, every hurt You carry
```

Verse 3:
```
When the storm was great it was hard to stand
And the ground beneath was sinking sand
But You found me there in the hurricane and You led me out and You called my name
And You led me out and You called my name
```

End:
```
      E    G#m      B    F#
And I will praise You,   I will praise You
      E    G#m                F#
You alone, carry me through it all
      E    G#m      B    F#
And I will praise You,   I will praise You
      E    G#m              F#        E    G#m              F#
You alone, carry me through it all,  You alone, carry me through it all
      E    G#m              F#
You alone, carry me through it all.
```
